

PRESS RELEASE

Villers-le-Bouillet (Belgium), November 2018

ENZYBEL International is the first papain enzymes producer EU GMP Pharma certified. The highest certification in the pharmaceutical field provides our clients with the utmost level of security, allowing us to be a reliable partner for pharmaceutical companies around the world.

The news is now official; the European authorities have attributed the GMP Pharma to Enzybel International for the production of Papain PNS 5®, an “*out of nature*” enzyme extracted from the fruit.

This certification gives our company a unique status: *“Enzybel International has invested in technologies, controlled processes, training and human resources to offer the most reliable product on the market. Thanks to this, our pharmaceutical clients benefit from an upstream certification”*, explains Christian Van Osselaer, CEO of Enzybel Group.

In the Belgian plant of Villers-le-Bouillet, this certification rewards the energetic teamwork implemented to rise the highest level of requirement in production: *“It was an interesting challenge since it led us to implement a new approach, a standard of excellence benefiting our team and customers. We are proud to get this certification”*, says Sonia Dangis, Head of Quality Assurance.

For Patrick Deprez, Chief Production Officer: *“This certification is a strong warranty for our clients. Thanks to it, they are 100% sure we offer them the top quality and the highest level of security and traceability. European standard is a strong guaranty”*.

ENZYBEL Group is the reference for natural enzymes solutions and leader on the market of natural papain for pharmaceutical and also for nutraceuticals, food, feed and cosmetology.

According to Christian Van Osselaer, CEO of Enzybel Group, the GMP Pharma certification *“makes our company the most reliable supplier of Papain on the market”*.

EU GMP Pharma reinforces the previous certifications obtained by our Belgian plant both for pharmaceutical and food applications. FSSC 22000 (Food Safety System Certification) and HACCP (Hazard Analysis Critical Control Points) already ensures our client the best level of certification required for the food industry. This pharmaceutical top level certification will reflect on our processes in each area, taking the food and nutraceutical standards in our plant at the highest level.

About ENZYBEL GROUP

ENZYBEL is the enzyme division of Floridienne S.A. Our company is the reference for natural enzymes solutions. We develop animal & plant-derived enzymes and provide innovative solutions for the industry.

The enzymes are produced for food & beverages, feed & petfood, pharma/nutraceuticals & technical, with a unique focus: highest quality products with full traceability at competitive prices. Enzybel Group strategy is aimed at sustainable and scalable growth.
